Firstbaze Training Resources and Competencies (TRaC) programme offers professionals and students the opportunity to access resources on a one-on-one basis either onsite as well as offsite.

Our tutors and short course speakers have the advantage of deciding where, when and who they would like to take on as they would have access to potential students profile to inform choice of courses and venue. *Short courses* are easily taken up. However courses would be run periodically. Our *Music Academy courses* continue on an on-demand basis with students applying through the year subject to the availability of a tutor at that time. We advise students however to consider more convenient blocks that would not interfere with their regular studies.

Music Academy

Firstbaze Music School and Academy offer its students the opportunity to develop their interests and abilities in music through a formal process of learning. Our goal is to assist those keen on learning an instrument as well as find and nurture talented musicians who may be interested in exploring the wider opportunities music brings including being part of an ensemble or orchestra e.t.c.

More significantly the music school accords tutors alternative source of income through direct payments on a sessional basis.

Registration is **location** based.

To be a partner, kindly complete our Partner/Tutor registration form. You would however need to have signed up as a user on Firstbaze.com to be eligible for our **Partner/Tutor programme**.
