At Firstbaze we recognize good things don't happen by chance. Good intentions alone do not effect change but better values make better communities.

Our goal is to effect change by nurturing truth, celebrating good and creating new experiences!

### **We aim to achieve this by:**

- Redefining community action through learning
- Breaking barriers, building communities
- Empowering communities
- Fulfilling dreams

### **We are Firstbaze!**

If you share our values then ***you are Firstbaze!*** So join us to begin a journey of equipping, empowering and emancipating our nations burdened by maladministrative practices to achieve the change we all desire.

Firstbaze is a non-partisan value driven organisation aimed at transforming lives of individuals, businesses and communities through **P**articipation, **I**nformation and **E**ducation - our **PIE** drive. Firstbaze is a *subsidiary* of TrilonTBS, a media and information management resource supporting small and medium sized businesses needing to establish an online footprint, media presence or support with training or resource development.

### **Why**

Firstbaze recognises there is poor investment in intellectual capacities of developing communities in the African subregion. There is similarly an absence of will in creating an environment that stimulates young and gifted individuals in the field of

arts, media or science and technology. Translating learning into realistic experiences demands access to tools and resources in relevant fields whether in art, science or media. Further, absence of an early experience of reward and affirmation of talent discourages growth of such talent.

### **What is needed.**

We focus on these three key elements to achieve our vision of empowering lives and enriching communities!

- *Participation*
- 
- *Information*
- 
- *Education*
