At firstbaze we focus on experiences to rekindle self belief and confidence in our innate abilities. This is achieved through innovative ways of engaging the community by:

- shifting emphasis of governance to and for the people and not a select few
- driving an experience of community through shared ownership of societal outcomes and hence pride at successes or indeed shame when things go wrong!
- stimulating and developing tools and equipment as resources for community development
- and stimulating investment in locally industries be it in arts, media or indeed technology.

We focus on translating intents into positive acts
