Developing lives and transforming communities!

- our goals

- Re-defining community action through learning
- Breaking barriers, building communities
- Empowering communities
- Fulfilling dreams

Firstbaze - Media Marketing and Events TRaC

Firstbaze is a media marketing, events and training outfit with the sole purpose of driving local and regional growth by offering outlets to engage with communities, stimulate learning and reward endeavours.

News & Events

With current deluge of news sources, communities may be best served where only the facts are delivered with a view to empower, equip and encourage engagement with civic responsibilities in the spirit of true self governance. A well informed society is likely to become a more responsible community and may be less easily misled by deceitful groups in or out of leadership. **Firstbaze** seeks to foster education and enlightenment of individuals, groups and communities in a manner that participatory learning becomes an aspiration of most if not all.

Our world, our say!

Individual Training and development

Skills acquisition and competencies through active engagement in goal directed learning with emphasis on reward and character development

Community and Resource development

Instigating social change and accountability through community events focused on active participation, positive experiences, and collective ownership of predictable outcomes following these activities e.g People's forum, Holiday Camps, Meet Your Local Representatives and democracy in action campaigns!
